## A Smokers' Catalogue

dunhill

In 1907 Alfred Dunhill opened a small tobacconist's shop in Duke Street, Saint James's. From this humble beginning has grown an international business, famed for the excellence of its pipes, lighters, tobaccos, cigars and other smokers' requisites.

Today, the modern building developed on the site of the old, houses a magnificent shop which preserves the Founder's original concepts of superlative quality and service and, by its vast and varied range of fine merchandise, delights smoker and non-smoker alike.

# Introduction to Pipe Smoking

*Since so many men have affirmed that pipe smoking is one of the most satisfying pleasures on earth, only inexperience or carelessness can account for those who, having a taste for smoking, have given up the pipe in despair. If full satisfaction is to be won, the following points are important:*

## QUALITY

In today's highly competitive market the price asked for a pipe by any reputable manufacturer is a reliable guide to its quality and workmanship. It is wise therefore, to buy the best pipe you can afford, for the better the pipe, the sweeter it will smoke from the very start and the greater and more lasting the satisfaction to be obtained from it. Guarantees and after-sales service are also valuable advantages to be gained from buying the best.

## SIZE

This is an important factor for although the bowl should be of sufficient thickness to smoke "cool," it is also essential for the pipe to be comfortable in the mouth. Large bowls naturally tend to be heavy, long stems increase the leverage on the teeth and short or bent stems reduce it.

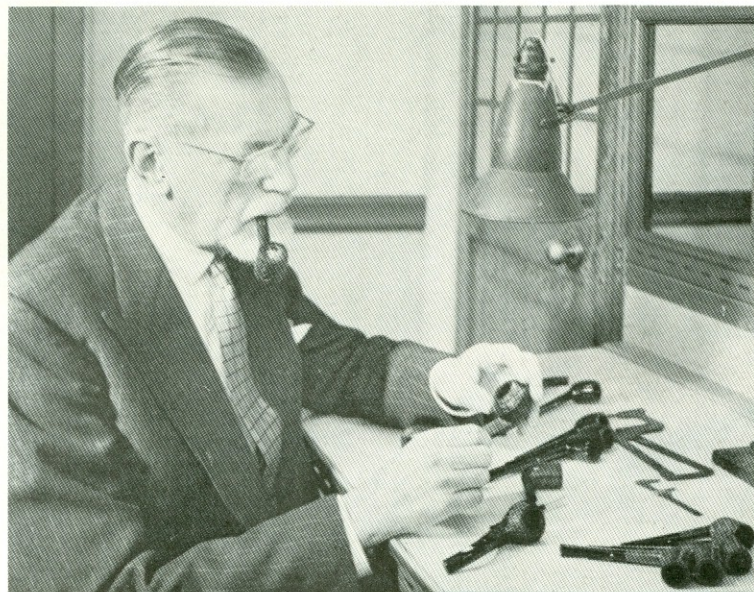

## SHAPE

This is largely a matter of taste and all the "Classic" shapes, well tried through the years, smoke satisfactorily. The "Billiard" is however, the most popular shape of all and is usually available in a large variety of bowl sizes and lengths of stem.

## FINISH

Modern first-quality briar pipe bowls have usually either a smooth highly polished surface (e.g., Dunhill "Bruyère" or "Root Briar") or have been specially treated with hot sand to leave the hard grain in bold relief (e.g., Dunhill "Shell Briar" or "Tanshell"). These latter pipes are lighter, size for size, than their equivalent shapes in "Bruyère" or "Root Briar" and are therefore ideal for those who prefer a large bowl without too much weight. Thus, the novice is recommended to begin with a pipe slightly smaller than average, with a fairly short stem and with a reasonable thickness of wood in the bowl (say  $\frac{3}{16}$  of an inch). If extra lightness is desired then "Shell Briars" or "Tanshells" may be chosen where available. Any of the following Dunhill shapes conform approximately to the specifications given above:

|                       |             |                    |     |
|-----------------------|-------------|--------------------|-----|
| "BILLIARD" Shape Nos. | 32, 249, 34 | "PRINCE" Shape No. | 258 |
| "APPLE" ..            | 110         | "POT" ..           | 463 |

# The Dunhill Pipe

The illustrations are approximately three-fifths actual size.

The durability, beauty and cool sweet smoking of the Dunhill pipe with its White Spot Trade Mark, are universally acclaimed.

Made from the finest quality briar (*Erica Arborea*), which is obtainable only from countries bordering on the Mediterranean, the "Dunhill" represents more than ninety separate processes spread over a period of several months. This ensures that it will smoke perfectly from the start and with proper care, will never lose its original sweetness. The mouthpiece is cut from block vulcanite which, although tough, is easy on the teeth and does not flavour the smoke. Hand-polishing enhances the beauty of the natural grain, giving the pipe-bowl a lustre that only improves with age and usage.

Although scarcity of fine briar has necessitated the pricing of Dunhill Pipes according to the amount of root employed in their manufacture, it is important to remember that irrespective of size and price, they are of one quality only—the finest.

All Dunhill pipes are supplied with plain or fishtail mouthpiece.

Example I  
'B' Quality - £22 10 0

Example II  
'C' Quality - £30 0 0

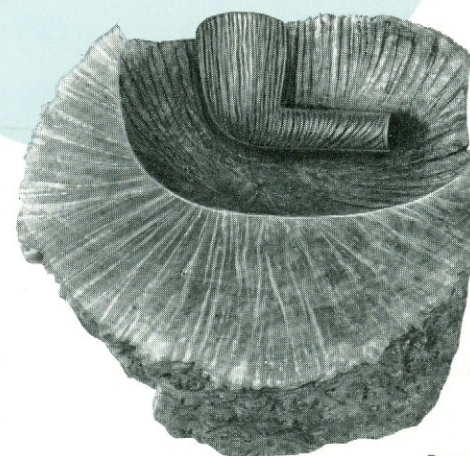

Example III  
'E' Quality - £55 0 0

The natural beauty of "Straight Grain" pipes and their comparative rarity have always made them much sought after by connoisseurs and collectors.

Dunhill "Straight Grain" pipes are offered in a "Root Briar" finish and this shows the beauty of the grain to perfection.

Being carved to catch the grain, no two are exactly alike, but every endeavour will be made to match any standard shape, subject to the quality desired being available.

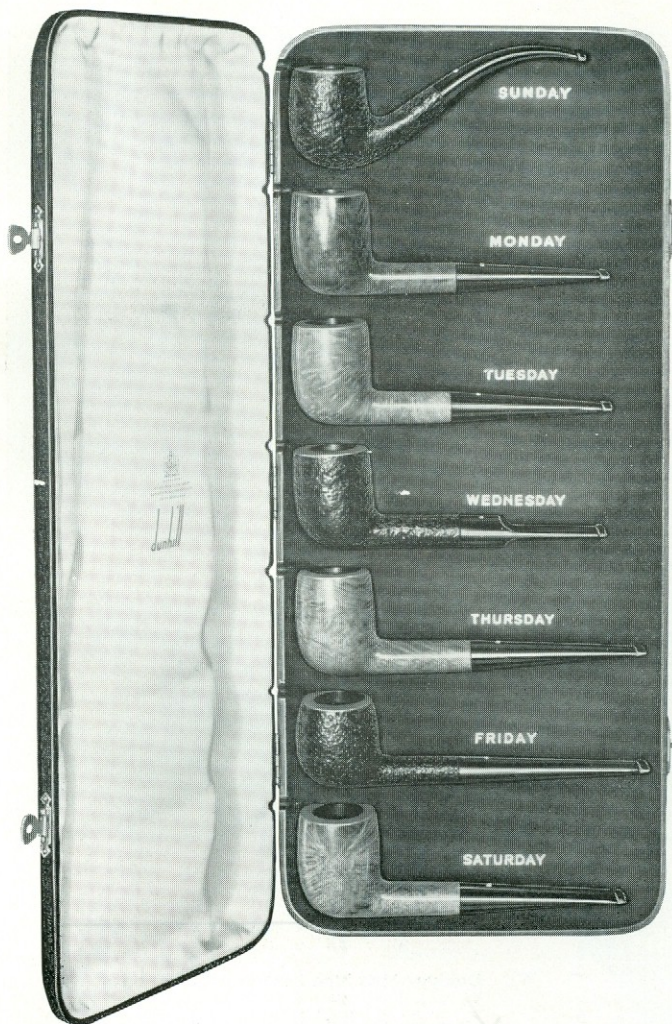

Prices according to the perfection of the grain, from £17 10 0 to £250 0 0

## Pipes in Cases

The "Bruyère" and "Root Briar" Pipes in Companion Cases are selected for their uniformity; the "Shell Briar" and "Tanshell" for their contrast of grain.

The cases themselves are fashioned by skilled craftsmen to fit the individual pipes and are covered in fine leather.

A large selection of cases is always kept in stock.

# About Tobacco

It must first be clearly understood that there are two main types of pipe tobacco—Mixtures, which are blends of Virginia, Turkish and other tobaccos and Virginias—a generic name which includes all the Flakes, Plugs, Twists, Spun Cuts and other processed tobaccos, all of which contain only leaf of the Virginia type.

The word Virginia, of course, no longer implies that the leaf in question comes only from Virginia; leaf of a similar variety from other countries as well as America, can be used in a particular blend.

The difference between these two main types is that Mixtures are noted primarily for their aroma which is produced by the addition of such leaf as Latakia, Perique or more rarely Havana. Such Mixtures are available in countless variations of strength and fragrance and to the experienced pipe smoker, it is the subtle aromatic quality of the smoke as it leaves the bowl that is the essential characteristic.

Virginias on the other hand, have their accent on flavour rather than aroma, although a well blended Virginia is fragrant enough in its own particular way.

No doubt because they were in the past more readily available, Virginia pipe tobaccos are today far and away the most commonly smoked and there are few pipe smokers who enjoy Virginias and Mixtures equally.

## "MY MIXTURE"

Alfred Dunhill always has available a very large variety of stock blends from which the would-be smoker can make his choice and some of the most popular are listed below. If, however, none of these proves to be the ideal sought, a special blend can always be prepared 'to measure' and if satisfactory, will then be registered under the customer's own "My Mixture" number.

### FAVOURITE "MY MIXTURES"

#### MIXTURES

**"My Mixture" No. 27 Mild.** A blend of light Virginia and Turkish.

**"My Mixture" No. 965 Medium.** An exceptionally cool and dry smoking blend of Virginia, Turkish and Latakia. Fine flavour and aroma.

**"My Mixture" No. 10 Full.** A cool and slow-burning blend of Virginia, Turkish and Latakia. Rich and satisfying.

#### VIRGINIAS

**"My Mixture" No. 21 Mild.** Old and new belt Virginias. Mild and naturally sweet with nutty flavour and pleasing aroma.

**"My Mixture" No. 373 Medium.** Old matured Virginia of mellow flavour and aroma. Also available in broad-cut—"My Mixture" No. 288.

**"My Mixture" No. 94 Full.** Dark Virginia. Cool and slow-burning with fine rich flavour and aroma.

**PRICE OF "MY MIXTURE"—144/- per lb.; 72/- per ½-lb.; 36/- per ¼-lb.; 18/- per 2 oz.; plus postage and part packing charge 10d. per 2 oz.; 1/1 per ½-lb.; 2/2 per ¼-lb.; 1lb. or more post free.**

This is perhaps a pity, for many a smoker of Virginia who enjoys an occasional cigar might well find the qualities of a Mixture equally satisfying.

Both Mixtures and Virginias can be obtained in Mild, Medium and Full strengths—terms that indicate the amount of flavour or aroma in the blend, which is controlled by the leaf used and the methods of manufacture.

Similarly there are three 'cuts' and most smokers prefer the medium, for while broad cuts smoke slowly, they are harder to keep alight and fine cuts, which burn freely, have a tendency to smoke hot.

Thus, the would-be pipe smoker should first establish his preference for either Mixture or Virginia and this is best accomplished by trying each in turn, devoting a day or two to one before changing to the other.

In both cases a tobacco of medium strength should be chosen (e.g. "My Mixture" 965 or "Ye Olde Signe" Virginia) as a 'Mild' may tend to burn the tongue and a 'Full,' may prove too strong.

His preference established, the smoker should then experiment further along the lines of his choice and in this connection, it is worth remembering that many lifelong pipe smokers have perhaps never realised complete satisfaction, because they have been too conservative in their tastes and failed to appreciate the pleasure to be gained by contrast and variety.

# Luxurious Tobaccos

*There are occasions as there are palates which demand a more than usually choice tobacco. For such, the four blends illustrated have been specially prepared.*

## "ROYAL YACHT"

This remarkable blend is composed of specially grown Virginia tobaccos, rich in natural sweetness. It is cool with no trace of harshness and possesses an unusually subtle and piquant aroma.

4-oz. tin £2 0 0      2-oz. tin £1 0 0

## "DURBAR"

The rare Eastern tobaccos used in this blend provide an interesting contrast to most other mixtures. It is extremely mild and cool and the "ribbon-cut" leaf incorporated in the blend helps to make it slow-burning.

4-oz. tin £1 18 0      2-oz. tin 19 0

## "YE OLDE SIGNE"

A subtle blend of Old and Middle Belt leaf, it is a most satisfying tobacco with a natural sweetness of which the palate never tires. Cool, fragrant and slow-burning it is an economical tobacco both indoors and out.

4-oz. tin £1 18 0      2-oz. tin 19 0

## "SHELL" SLICED ROLL

As with flake, this Virginia sliced roll gives of its best when "rubbed" out before use. It is cool and slow-burning and has a delightful mellow flavour.

4-oz. tin £1 18 0      2-oz. tin 19 0

## "THREE TOBACCOS"

Because variety can greatly add to the pleasures of smoking, these tobaccos have been specially prepared to provide an interesting smoke for any time of the day.

## Choice Cigars

### Dunhill "Selección Suprema"

The quality of a cigar depends to a large extent on the area in which the various types of leaf composing it are grown and it is no secret that the finest still come from the "Vuelta Abajo" district of Cuba.

Such tobaccos, blended and rolled by hand with traditional skill and care, are used in the Dunhill 'Selección Suprema' and it is true to say that there are no finer cigars than these anywhere in the world.

In such cigars, after careful conditioning in the Dunhill Maturing Rooms for at least nine months, the distinct and jealously prized characteristics of each brand are brought to perfection.

Dunhill 'Selección Suprema' are packed in Cabinet bundles of 50 or boxes of 25, as well as Gift Cabinets of 100, but any quantity may be purchased from a single cigar upwards.

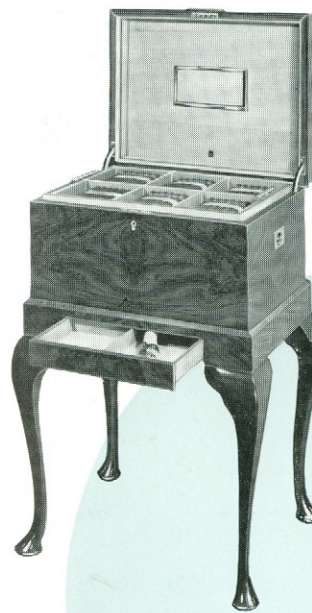

### The Dunhill Maturing Rooms

Here, the most modern form of Air Conditioning Plant provides a constant humidity and temperature all the year round. After a short period in which the newly arrived cigars are allowed to settle down they are put into Cedarwood cabinets and slowly matured.

Sample cigars from boxes and bundles are tested at regular intervals to ensure that each is mellowing at the correct rate and no cigar is ever sold for immediate smoking unless it has reached maturity.

For those customers who like to keep a stock of their favourite cigars, free storage facilities are provided. These cigars may be withdrawn as desired with the sure knowledge that they are always in perfect condition for smoking.

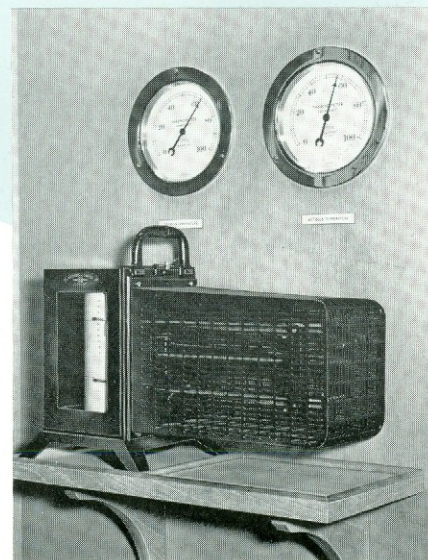

For the less experienced smoker, the advice of experts in the Cigar Department is readily available. Such advice is frequently welcomed by those choosing cigars as gifts or in circumstances which make a personal selection impossible. A Comprehensive Cigar Brochure, price list and shape chart will gladly be sent on request.
