

**A Reading List for the Pipe Smoker and Pipe Collector**  
**(Fall 2016)**  
**Ben Rapaport, 9831 Highland Glen Place, Colorado Springs, Colorado, 80920-2349**  
**(719/203-5970; ben70gray@gmail.com)**

In May 1987, I had prepared a handout for a seminar on the history of tobacco literature presented at Barry Levin's pipe show in Westborough, Massachusetts. Since then, many other works have appeared in print, and I continue to revise and update the list as I become aware of these new books and pamphlets. I feel qualified to assemble this list, because my own library is comprised of more than 3,000 volumes, but if I omitted any that should have rightfully deserved proper recognition, I will add those absent titles. The list is not proprietary, so reproduce it at will.

On the next several pages I list only English-language books (as well as booklets/pamphlets/brochures) organized by rather arbitrary topical headings. Using these topical headings is not a bibliographic crime, but it creates a false sense about these domains; most books in this field cover a multitude of related subjects. Not including foreign titles denies the uninitiated foreign-language-fluent reader the opportunity to know about some very lush and colorful books published in other languages. The list also excludes books on snuff, cigars, and cigarettes; since some pipe smokers also smoke cigars, the right side of my brain has been telling me to add cigar books to this list, and the left side of my brain has been saying: "create a separate list for cigar smokers." I have listened to both sides of my brain, and I have prepared a separate list for the bookish cigar smoker. On this particular list, you will find many rare and out-of-print titles. If the book is a good reference, in my opinion it belongs on the list, even if you cannot easily reach out and find it at any used bookstore.

Preceding this list are some of my observations, many formulated during the past 50 plus years as a passionate bibliophile, and others formulated during the past 50+ years merchandising these books. If the following snippets and the list serve you well in your search for a new or an old book, this instructional note will have served its purpose. I share the following thoughts with you for whatever they are worth.

● The literature of tobacco and smoking is an arcane field because, today, few think of tobacco as a field of research. However, would you believe that, next to religion, it's an area covered by many printed words? In 1989, when I published *The Global Guide to Tobacco Literature*, I had counted some 5,800 titles in the predominant languages—English, French, German, Italian, and Dutch. By mid-1994, another 150 or so books had appeared in print! So, the inventory continues to expand, and it covers a wealth of interrelated and, sometimes, disparate areas such as: history of smoking customs and tobacco technology; agriculture and farming; prose and poetry; occasional fiction; specialty books on pipe crafting; snuff and its accouterments; tobacco boxes, jars, and pocket tins; cigar boxes, labels, cigar bands and cigar accouterments; tobacco art; cigarette packs; matchboxes, matchbox labels and match books; cigar-store figures; industry and company histories; museum exhibition catalogs; special auction house catalogs... and the list goes on.

● The range of material is as broad as the variegated interests of most smokers who choose distinctive pipes and tobaccos to suit their own particular tastes. Plenty of books are in print from which to choose something suited to individual tastes. Many of the titles appearing herein have been published privately, some as a limited edition, others as vanity press or facsimile reprints. Some were short-runs and the supply was exhausted within six months to one year after the printer's ink was dry. That may be why your local tobacco shop and bookstore never stocked them.

● Where do you get some of these hard-to-find titles? You know your tobacconist better than I do, so you also know whether he sells tobacco books. Some do, some do not, but most have as difficult a time as the consumer determining what's in print. Why? There's no industry clearinghouse that keeps the retailer apprised; few publishing houses know how to penetrate the tobacco industry; and let's face it, books on tobacco just aren't that profitable, and today's tobacconist is trying to stay alive with higher-profit-margin product lines. So, you've got to find other avenues such as researching *Books in Print*, visiting out-of-print and antiquarian book dealers, going to book fairs and pipe shows, searching the Worldwide Web, and getting on the good side of those who have a personal library of tobacco books...they might point the way for you by making recommendations on what to read, and where to get it.

● One way to build a referential library is through my newsletter, "Antiquarian Tobacciana." It's not a totally

free service, but it comes close to being free. The newsletter is designed to keep its readership abreast of ‘baccy goings-on, including new releases from around the globe. I do not stock every title, because I am very selective. I am not interested in selling books that promote the anti-smoking theme, and books on harvesting tobacco, after all, are not very invigorating. My criteria are that the book be illustrated, well written, and reasonably priced, and that the central theme be popular and interesting. But, I am not averse to providing you the bibliographic details about any book in print that I do not stock so that you can order it directly from the publisher/distributor.

● Comments on books in general? The very best of poetry and prose was published in the late 19th Century–early 20th Century, and the very best illustrated books are those published in the late 20th Century and into this century. As to the caliber of books — binding, quality of paper and ink, photography, number of color illustrations as a relative measure of merit to price — I would have to say that, on average, foreign books win for their character and their *‘je ne sais quoi.’* As previously stated, no foreign titles appear in this list, and if you read French, German, or Italian—the three most prominent of foreign-language books on these topics—write to me and I’ll offer some suggestions.
