CHOICE TOBACCO

"MY MIXTURE"

As opinions differ, so also do men's tastes, particularly in tobacco, and yet, how many take the line of least resistance and buy what comes easiest to hand. Little do they realise the pleasure they miss by not taking the trouble to find the right blend for their particular palate. Given the necessary information, Alfred Dunhill undertakes to 'make a mixture to measure' so why be content with less than the best? Consultation with the blender at 30 Duke Street, either in person or by correspondence, will enable samples to be prepared and submitted for your judgment and when your ideal is attained the Mixture chosen will be registered in the "My Mixture" book

The following blends have found favour among connoisseurs of Pipe Tobaccos

SNUFF

In recent years there has been a remarkable increase in the use of Snuff, not only of the traditional kind but also of the modern, refreshing and stimulating medicated snuff.

To meet these rather different demands, Alfred Dunhill introduces the following two new blends :-

"APERITIF"—developed from an 18th century recipe, with a superfine base and an exquisite delicate perfume

10/6 per 1-oz. tin. 3/- per miniature tin

"MENTHUS"—containing a subtle combination of menthol, eucalyptol and eucalyptus

9/- per 1-oz. tin. 2/6 per miniature tin

LUXURIOUS TOBACCOS

There are occasions, as there are palates which demand a more than usually choice tobacco. For such, the four tobaccos illustrated have been specially prepared

"DURBAR"

The rare Eastern tobaccos used in this blend provide an interesting contrast to most other mixtures

It is extremely mild and cool—qualities seldom found in combination

The "ribbon-cut" leaf incorporated in the blend helps to make it slow-burning and it is a mixture that can be smoked with the utmost pleasure at any time of the day

"YE OLDE SIGNE"

For the admirer of Virginia leaf with all its time-honoured qualities, there is probably no finer tobacco obtainable

THE DUNHILL PIPE

The cool, sweet-smoking properties of The Dunhill Pipe are universally acclaimed, and behind this unequalled reputation for quality, is a history of tireless search in Mediterranean Lands for the perfect roots from which these pipes are made. Each process of manufacture in the Dunhill factory is supervised with exacting vigilance even to the mouthpiece which is cut from a block of compressed vulcanite. Lavish care is bestowed by every craftsman through whose hands the pipes pass and only after the most rigid inspection do they emerge as authentic "Dunhills"

THE "BRUYÈRE"

The Dunhill "Bruyère" Pipe is carved from roots of the Tree-Heath, (Erica Arborea), a light, tough and close-grained wood, admirably suited to pipe-making and which, in the hands of the expert craftsman, yields a perfect example of the pipemaker's art. When finally polished, the bowl assumes a rich mahogany shade which shows the natural beauty of the grain to perfection and has a lustre only improved by age and usage

THE "ROOT" BRIAR

The Dunhill "Root" Briar, a pipe of superb smoking quality, is shaped from a light-brown root dug in arid rocky mountain country. Growth under these adverse conditions hardens the wood and develops a peculiarly striking grain. With use, the "Root" Briar colours in a fascinating way, rivalling the rich variety of tones of the seasoned Meerschaum

THE "SHELL" BRIAR (REGD.)

Each "Shell" Briar is unique; no two are alike except in their perfect smoking qualities. The Algerian Briar from which this pipe is made is beautifully grained, and by the application of heat and sand, the freshly carved bowl is shrunk to a mere shell, leaving the natural grain in clear and bold relief. Tough, sapless, hard and light and almost black in colour, the finished "Shell" has every quality that makes for durability

THE "TANSHELL"

The "Tanshell," made from roots of the "Erica" family found in Sardinia, has, like the famous "Shell" Briar, a distinctive grain in bold relief. Careful seasoning and certain processes not previously employed in pipemaking, produce a pipe with superb smoking qualities and unusual appearance. The light tan bowl darkens and colours with use, adding further pleasure to smoking

THE DUNHILL "GIFT SERVICE"

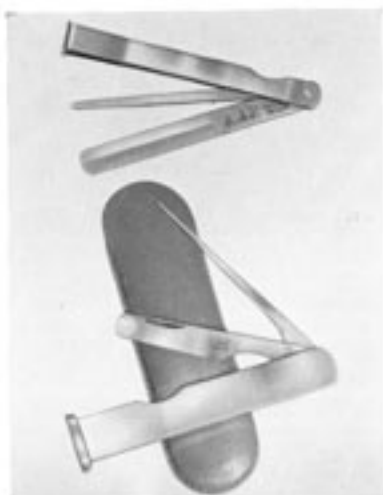

Those desirous of sending a pipe as a gift but who are in doubt as to style or size will be interested to know that Alfred Dunhill is always pleased to submit a selection of pipes on approval. They are dispatched in a special box which can conveniently be used for the return of any not required. An attractive alternative may be found in the "Gift Token Voucher" Service detailed on the Order Form. In addition to the above facilities it is also understood that any Dunhill articles received as gifts will gladly be exchanged for others of equal value provided they are returned in their original condition

The quality of a cigar depends on the area in which the various types of leaf are grown and it is no secret that the finest come from the "Vuelta Abajo" district of Cuba

Such tobaccos, blended and rolled by hand with traditional skill and care, are used in the Dunhill "Selección Suprema" and it is true to say that nowhere in the world can finer cigars be found

In such cigars, after careful conditioning in the Dunhill Maturing Rooms for at least ten months, the distinct and jealously prized characteristics of each brand are brought to perfection

Dunhill "Selección Suprema" are packed in Cabinet Bundles of 50 or Boxes of 25, as well as Gift Cabinets containing 100 or more, but any quantity may be purchased from a single cigar upwards

JAMAICAN (Dunhill Selection)

In recent years, many have learned to appreciate the characteristic flavour of the Jamaican and, it is true to say that, when carefully conditioned in The Dunhill Maturing Rooms, it bears favourable comparison with its elder brother from Cuba

The undermentioned list gives some indication of the varied selection available—all in perfect condition and ready for immediate smoking

THE DUNHILL "CRYSTAL FILTER" CIGARETTE HOLDER (above, left)

Little introduction is needed for this extraordinarily effective filter holder which is now used all over the world. The secret lies in the amazing properties of the Dunhill "Crystal Filter" which cools and mellows the smoke, traps tars and dust without spoiling the flavour of the tobacco and thus adds infinitely to your enjoyment. Each filter lasts for 15-20 cigarettes and can be changed in a moment. The holder is available in two sizes—"SLIM" and "STANDARD." Both have the new quick-action spring ejector but the "STANDARD" is built on sturdier lines and takes a somewhat thicker filter.
